

Fault rate with memory size of 20:

FIFO: 78.7%

LRU: 77.9%

Second chance: 78.05%

En. second chance: 77.85%

Fault rate with memory size of 200:

FIFO: 5.00%

LRU: 5.00%

Second chance: 5.00%

En. second chance: 5.00%

With memory size of 200, the size of memory exceeds the number of pages we are expected to handle.

Thus, the only faults are the 100 "cold start" faults
